SOCIO-INFORMATICS / INFORMATION SYSTEMS MANAGEMENT
INFORMATION SYSTEMS 2 AND SYSTEMS MODELLING
"GETTING STARTED" ASSIGNMENT

Due Date: 10 August 2018, 17:00
Total: 10 marks
GitHub: Getting Started

Specification

Create a Git "Cheat Sheet" using HTML5 and CSS to aid you during the course of this semester. Your cheat sheet should use at least one HTML page, CSS stylesheet and image (but more of each if you feel it is necessary). Like any similar guide, it should be concise with just headings and minimal viable command snippets and explanations.

Submission

You should create a local repository from the instructions provided by GitHub on your "Getting Started" assignment repo. You should add and commit each of the files you use above as appropriate, but you should create at least 5 commits. Part of this assignment is actually using Git and GitHub.

Assessment

Your cheatsheet will be judged on how effective it is and out of five marks. Your Git commits (and messages) and pushes to GitHub will also be evaluated out of five marks, for a total of 10 marks for this assignment.
